

Person 1 - Dataset Folder Instructions

What this file is for

For Person 1, the required project folder is named **CSAI415_D1**. This folder already contains the **pdfs** folder and the other files needed to run the first code.

The folder should be downloaded from the Google Drive link below, then uploaded to the person's own Google Drive account before running the code in Google Colab.

Google Drive folder link

https://drive.google.com/drive/folders/1BiF8EAZoBw3yHlgjfnQ_WJUsbft6qZp?usp=drive_link

What Person 1 should do

1	Open the Google Drive link above.
2	Download the full folder named CSAI415_D1, not only one file.
3	Upload the full CSAI415_D1 folder to their own Google Drive/MyDrive.
4	Make sure the pdfs folder stays inside CSAI415_D1.
5	Open Google Colab and run the Person 1 code using this folder path.

Expected folder structure

```
MyDrive
├── CSAI415_D1
│   ├── pdfs
│   │   ├── paper1.pdf
│   │   ├── paper2.pdf
│   │   └── ...
│   ├── Dataset Special Topics.xlsx
│   └── outputs
```

Important note

Do not upload only the PDFs separately. The code expects the same folder organization, so the whole **CSAI415_D1** folder should be placed inside Google Drive exactly as shown above.

Main path used in the code:

```
BASE_DIR = "/content/drive/MyDrive/CSAI415_D1"
```
